

1	Explain in detail the NLN Line clipping algorithm with the help of diagrams.
2	Explain Weiler Atherton Polygon clipping algorithm with the help of a 6 side polygon example.
3	Write short notes on a) Interpolation splines b) Approximation splines c) Convex hull d) First order parametric continuity e) Blending functions f) Natural cubic splines
4	What are B-spline curves? Discuss cubic, Uniform, non uniform B-splines.
